

EC SERIES - PUMP MODELS BY REO-PURE™

A compact, dependable RO system equipped with an integrated pump, designed to provide consistent water pressure and high-quality drinking water for residential applications. Engineered for efficiency and reliable performance, these systems are ideal for homes with low incoming water pressure. Standard features are carefully selected to simplify installation, operation, and maintenance while ensuring optimal filtration performance.

STANDARD FEATURES

- High Quality RO Membrane
- Superior Pre-Treatment Filters
- Automatic Shutoff Valve
- John Guest® Quick Connect Fittings
- Installation Parts Packet
- Easy to Follow User Manual
- Fully Assembled
- One Year Limited Warranty
- Assembled in the U.S.A

BOOSTER PUMP 4-STAGE

Designed to boost feed water pressure for better production and membrane efficiency. Extremely quiet operation (less than 45 dBA). Low voltage (24V). Perfect for applications with low feed water pressure or high TDS.

PERMEATE PUMP 3-STAGE

Designed to reduce waste water by up to 80%, decrease storage tank fill-time, and improve overall membrane efficiency. No electricity required! Perfect for applications where efficiency is the highest priority.

DELIVERY PUMP 3-STAGE

Designed to increase product water pressure from the storage tank. Perfect for basement installations or any applications where higher dispensing pressure is required (e.g. multiple points-of-use such as ice makers, wet bars, drinking faucets, etc.).
