

# EC SERIES - SPECIALTY MODELS BY REO-PURE™

A versatile RO system designed to address specialized residential water treatment needs. These models incorporate advanced technologies such as ultraviolet (UV) disinfection, alkaline remineralization, and PFAS reduction to provide enhanced water purification and protection. Engineered for dependable performance and efficiency, each system includes carefully selected standard features that simplify installation, operation, and maintenance.

## STANDARD FEATURES

- High Quality RO Membrane
- Superior Pre-Treatment Filters
- Automatic Shutoff Valve
- John Guest® Quick Connect Fittings
- Installation Parts Packet
- Easy to Follow User Manual
- Fully Assembled
- One Year Limited Warranty
- Assembled in the U.S.A

## UV DISINFECTION 4-STAGE

Designed to disinfect drinking water, without the use of harmful chemicals. Effective against microbes and protozoan cysts that are highly resistant to chlorine, eliminating these threats from water with an effectiveness of 99.99%. Perfect for applications with well water sources and other installations where sanitation is a concern.

## ALKALINE 4-STAGE

Designed to put beneficial minerals back into RO water to produce a pH balanced alkaline water. Perfect for those who are health-conscious to the benefits attributed with raising pH levels.

## PFAS 4-STAGE

Designed to reduce harmful PFAS, including PFOS and PFOA. Utilizes a strong base anion exchange resin to target and capture these persistent chemicals. Perfect for advanced filtration against emerging contaminants.
